SHRUTI MORE

AI & Data Science Engineering Student | AI/ML | Python | Generative AI

Pune, Maharashtra, India | shrutivmore156@gmail.com | +91 9067018156 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Enthusiastic final-year B.E. Artificial Intelligence & Data Science student passionate about building real-world AI/ML and Generative AI solutions. Skilled in Python, OOP, REST APIs, Flask/FastAPI, machine learning, computer vision, LLM integration, LangChain, and RAG. Experienced in working with SQL/NoSQL databases and integrating intelligent models into practical backend applications.

TECHNICAL SKILLS

Languages & Core:	Python, C++, JavaScript (ES6+, async/await), SQL, Object-Oriented Programming (OOP)
AI / Machine Learning:	Scikit-learn, TensorFlow/Keras, YOLO (v5/v8), Computer Vision, Feature Engineering, Evaluation
Generative AI & LLMs:	RAG Architecture, LangChain, LangGraph, Embeddings, Vector Databases (FAISS, Chroma), OpenAI/ Gemini API
Backend & Web APIs:	FastAPI, Flask, RESTful APIs, Web Architecture, Asynchronous Programming
Databases & Analytics:	PostgreSQL, MySQL, MongoDB, Pandas, NumPy, Matplotlib, Seaborn, EDA
Tools & Platforms:	Git, GitHub, VS Code, Google Colab, Streamlit, Postman

EDUCATION

PES Modern College of Arts, Science and Commerce **Pune, MH | Expected Graduation: 2027**

Bachelor of Engineering (B.E.) — Artificial Intelligence & Data Science | CGPA: 7.2 / 10

FEATURED AI & ML PROJECTS

PAN Card Detection & Tampering Identification System *Python, YOLOv8/v5, TensorFlow, Flask, OpenCV*

- Architected an end-to-end computer vision application to detect real-time document tampering and verify PAN card authenticity.
- Implemented YOLO object detection for document region extraction and fine-tuned CNN models for forgery detection.
- Engineered a robust Flask backend API to serve low-latency model predictions to a web interface.

Email Spam Classification System *Python, Scikit-learn, Pandas, NLP, Vectorization*

- Built an end-to-end NLP classification pipeline processing text data into feature vectors using TF-IDF and Bag-of-Words.
- Trained and evaluated classification models (Naive Bayes, Logistic Regression), achieving high accuracy and low false-positive rates.

End-to-End Data Analytics & Insights Suite *Python, Pandas, NumPy, Matplotlib, Seaborn, SQL*

- Conducted exploratory data analysis (EDA) and pattern recognition across domains including Netflix, Sales, Customer Churn, and Stock Market.
- Delivered structured data cleaning pipelines, relational SQL queries, and visual analytics dashboards.

WORK EXPERIENCE

Data Science Intern — GreenSkill Edutech Foundation

- Executed data analysis pipelines and machine learning experiments using Python (Pandas, NumPy, Scikit-learn).
- Performed feature engineering, missing value imputations, and exploratory data analysis to improve downstream model performance.

Data Science Intern — 1stop

- Applied machine learning algorithms to solve structured classification and regression challenges.
- Generated diagnostic visualizations using Matplotlib and Seaborn to communicate analytical findings.

KEY COURSEWORK

Data Structures & Algorithms (DSA) • Database Management Systems (DBMS) • Object-Oriented Programming (OOP) • System Architecture & REST Services • Operating Systems • Computer Networks
